

RANEESH VR

B.Tech Computer Science & Engineering | 3rd Year

✉ vrraneesh2006@gmail.com ☎ +91-9943181639 github.com/Raneesh73 Amity University, Gurugram, India

OBJECTIVE

Results-driven B.Tech Computer Science student (CGPA 8.7/10) with a strong foundation in full-stack web development, React JS, Python, and AI/ML integration. Passionate about building real-world solutions — from agricultural bots to AI-powered fake information detectors. Seeking a Software Engineer Intern role where I can contribute technical depth in Python, .NET, React JS, and QA automation while growing in a collaborative engineering environment.

EDUCATION

B.Tech in Computer Science & Engineering

Amity University Gurugram · India CGPA: 8.7 / 10

TECHNICAL SKILLS

Languages : Java, Python, JavaScript, HTML, CSS

Web Development : React JS, Frontend Development, Backend Development, REST APIs, Responsive Design

AI / ML : AI Integration, NLP Basics, Generative AI, Fake Information Detection, ML Fundamentals

QA & Testing : Test Case Design, Manual Testing, QA Automation exposure

Tools & Others : Git, GitHub, VS Code, MySQL

PROJECTS

Agriculture Bot *Personal Project*

Tech Stack: Python | AI Integration | Chatbot

- Developed an intelligent bot to assist farmers with crop recommendations, pest control advice, and weather-based farming tips.
- Integrated AI capabilities to provide region-specific responses, improving accessibility and usability for rural users.

AI-Integrated Fake Information Detector *SIC Project*

Tech Stack: Python | AI/ML | NLP

- Built a misinformation detection system using AI/ML techniques as part of the Samsung Innovation Campus program.
- Applied natural language processing to classify content authenticity with measurable accuracy on test datasets.

Quiz App for Tech Students *Web Application*

Tech Stack: JavaScript | HTML/CSS | Full-Stack

- Designed and developed a full-stack quiz platform for engineering students with dynamic question sets and score tracking.
- Implemented user sessions, leaderboard, and responsive UI optimized for both desktop and mobile devices.

College Canteen Food Ordering App *Ongoing*

Tech Stack: React JS | Full-Stack Web Development

- Developing a digital food ordering system to eliminate canteen queues and streamline meal ordering for students.
- Features include menu management, real-time order updates, and integrated payment flow.

CERTIFICATIONS

- Google – Generative AI Foundations Course, 2025
- AI Program Certification – Samsung Innovation Campus (SIC), 2026
- Computer Architecture – Elite Certificate – NPTEL (IIT/NIT Collaborative Program), 2025

STRENGTHS

Problem Solving Quick Learner Team Collaboration Project Management Effective Communication Attention to Detail
Initiative-Driven
